

	Test scenario	Document No.: 1
	Project: TranslAide	Tester: KAJ
	System version: 10.11.0.21	

Tested element	Login
Description	Verification of login functions, positive and negative test cases
Additional data	Login, password

ID	Test	Prerequisites	Steps	Expected result
1.1	Log in with the correct data	There is a registered user in the system	1. Enter the correct login and password	The user is logged in, the dashboard is displayed
1.2	Log in with an incorrect login		1. Enter the incorrect login	The user is not logged in, the error message is displayed
1.3.	Log in with a wrong password		1. Enter the correct login	The user is not logged in, the error message is displayed
1.4	Log in with empty fields		1. Press login button leaving the fields of the form empty	The user is not logged in, the message is displayed

Tested element	Changing the interface language
Description	Check whether the interface language can be changed
Additional data	

ID	Test	Prerequisites	Steps	Expected result
2.1	Changing the interface language to English	Interface of the app is Polish	1. Press the flag icon in the top right corner 2. Choose English	Interface is changed into English
2.2	Changing the interface language to Polish	Interface of the app is English	1. Press the flag icon in the top right corner 2. Choose Polish	Interface is changed into Polish

Tested element	Documents
Description	Check of functionalities in the documents view
Additional data	Login, password

ID	Test	Prerequisites	Steps	Expected result
3.1	Searching in the list of documents – existing document	There are documents in the system	1. In the search box enter the text occurring in an existing document title or description	All documents containing the searched phrase in the title or in the description are displayed
3.2	Searching in the list of documents – non-existent document	There are documents in the system	1. In the search box enter a random text	There are no documents displayed. Message: “No documents found”
3.3a	Sorting by document title – ascending	There are documents with different names in the system	1. In the column “File name” press the arrow pointing up	Documents are sorted ascending by title
3.3b	Sorting by document title – descending	There are documents with different names in	1. In the column “File name” press the arrow pointing down	Documents are sorted descending by title

		the system		
3.4a	Sorting by document creation date – ascending	There are documents in the system	1. In the column “Created” press the arrow pointing up	Documents are sorted in the ascending order by creation date
3.4b	Sorting by document creation date – descending	There are documents in the system	1. In the column “File name” press the arrow pointing down	Documents are sorted descending by creation date
3.6	Selection of the number of displayed documents on the page	There are documents in the system	1. Select a number of displayed documents from the drop-down list at the bottom of the page	The chosen number of documents is displayed
3.7	Adding a document to the system	User is logged in	1. Press “Add document” button 2. Choose a document to be translated from your computer by clicking “browse” button OR drag and drop a file to upload 3. Choose the direction of the translation 4. Choose the document’s permission type 5. Confirm by clicking “Add” button	The file is uploaded into the system; the user is redirected to the newly uploaded document
3.8	Display of the document	There is a document in the system	1. Choose a document to be displayed by clicking its name	The user is redirected to the chosen document
3.9	Deletion of the document	There is a document in the system	1. Click the red button with the "X" mark in the row of the document you want to delete 2. Confirm the deletion of the file by clicking "OK"	The document is deleted from the system
3.10	Download of the source file	There is a document in the system	1. Click the down arrow button in the row with the document which source file you want to download	The source file is downloaded
3.11	Download of the translated file	There is a translated document in the system	1. Click the right arrow button in the row with the document which target file you want to download	The translated document is downloaded
3.12a	Change the type of the document permission from public to private	There is a public document in the system	1. Press toggle in “Private” column	Toggle changes the color and the type of the document permission is set to private
3.12b	Change the type of the document permission from private to public	There is a private document in the system	1. Press toggle in “Private” column	Toggle changes the color and the type of the document permission is set to public

3.13	Selection of the page number on the document list	There are more than 5 documents in the system; the number of the displayed documents on the page is smaller than the sum of all of the files in the system	1. Click the next page number OR 2. Click the page number you are currently on, clear the page number by pressing the "Delete" button and enter the number of the page you want to move to, press "Enter" OR 3. Click the right or left arrow	User is redirected to the chosen page number
3.14	Going to the home page		1. Click "TRANSLAIDE" text in the page header	User is redirected to the dashboard

Tested element	Document view
Description	Check of functionalities in the document view
Additional data	Login and password

ID	Test	Prerequisites	Steps	Expected result
4.1	Change the number of the displayed segments in the document's view	There is an uploaded document in the system	1. Go to any document 2. Change the number of the displayed segments in the document's view	The system remembers the number of the displayed segments in the document's view, after exiting the document and returning to it, the number of segments that was previously selected is displayed
4.2	Translating	There is an uploaded document in the system	1. Select the icon with a triangle in the upper right corner of the page 2. Select whether all segments or only those unverified shall be translated	Document is being translated
4.3	Selection of the page number of the document	There is a segmented document in the system.	1. Click the next page number OR 2. Click the page number you are currently on, clear the page number by pressing the "Delete"	User is redirected to the chosen page number

			button and enter the number of the page you want to move to, press "Enter" OR 3. Click the right or left arrow	
4.4	Filtering segments by entered phrase	There is a segmented document in the system	1. Enter the searched phrase in the text field above the source or target text segments	All segments that contain the searched phrase are displayed and segments that do not contain this phrase are not displayed
4.5a	Search and replace function	There is a segmented document in the system	1. Click the magnifying glass icon 2. Enter the searched phrase 3. Click "Find next"	The searched phrase is highlighted
4.5b	Search and replace function, search for non-existent phrase	There is a segmented document in the system	1. Click the magnifying glass icon 2. Enter the searched phrase 3. Click "Find next"	There is no phrase highlighted; message that no searched phrase was found is displayed
4.6	Show statistics	There is a segmented document in the system	1. Click the plot icon	User is redirected to the document statistics page
4.7	Download source file	There is a segmented document in the system	1. Click the download button	The source file is downloaded
4.8	Export target file	There is a segmented and translated document in the system	1. Click the export button 2. Choose the file format 3. Confirm by clicking "Export target text" button	The target file is downloaded
4.9	Set the status of the segment, choose from the drop-down list on the right side	There is a segmented and translated document in the system	1. Select the status from the drop-down list in the "Status" column that you want to set for the selected segment and click it	The status of the segment changes to the selected one
4.10a	Set the status of the segment; choose from the drop-down list at the bottom of the page	There is a segmented and translated document in the system	1. Select the segment by clicking the checkbox on the left side of the segment 2. Select the status you want to set from the drop-down list at the bottom of the page 3. Confirm by clicking the "Set status" button	The status of the segment changes to the selected one

4.10b	Set the status of several segments; choose from a drop-down list at the bottom of the page	There is a segmented and translated document in the system	<ol style="list-style-type: none"> 1. Select several segments by clicking the checkbox on the left side of the segment 2. Select the status you want to set from the drop down list at the bottom of the page 3. Confirm by clicking the "Set status" button 	The status of all of the segments changes to the selected one
4.10c	Set the status of all of the segments; choose from a drop-down list at the bottom of the page	There is a segmented and translated document in the system	<ol style="list-style-type: none"> 1. Select all segments by clicking the checkbox in the top row on the page 2. Select the status you want to set from the drop-down list at the bottom of the page 3. Confirm by clicking the "Set status" button 	The status of all of the segments changes to the selected one
4.11	Edit translated segments	There is a segmented and translated document in the system	<ol style="list-style-type: none"> 1. Choose a translated segment to edit 2. Edit translated text 3. Press "ctrl" + "enter" or click anywhere on the page outside the editing frame to accept the changes 	Changes are saved
4.12	Filter segments by status	There is a segmented and translated document in the system	<ol style="list-style-type: none"> 1. Click on the "Filter" icon 2. Choose a status by which all of the segments should be filtered 3. Accept by clicking "Filter" button 	The segments are filtered by the chosen status
4.13	Edit comments	There is a segmented and translated document in the system	<ol style="list-style-type: none"> 1. Click the button with the message icon at the top of the table 2. Click on the "Add comment" text 3. Add your comment 4. Click outside of the text field 	The comment is added to the segment

Tested element	Dashboard
Description	Check of functionalities in the dashboard
Additional data	Login, password

ID	Test	Prerequisites	Steps	Expected result
5.1	Go to the documents	The user is logged in and there is an uploaded document in the system	1. Click the "Documents" button in the page header or in the middle of the page	The user is redirected to the documents
5.2	Go to the last document	The user is logged in and there is an uploaded document in the system	1. Click the "Last document" button	The user is redirected to the last opened document
5.3.	Adding a document to the system	The user is logged in	<ol style="list-style-type: none"> 1. Press the "New document" button 2. Click "Choose file..." text or press the "Browse" button 3. Select the file from the computer 4. Select the translation direction 5. Choose the document's permission type 6. Press the "Add" button 	<p>The document is added to the system; the user is redirected to the document page</p> <p>If the file is not selected and the user presses the "Add" button, an error message is displayed</p>
5.4	Go to the translator	The user is logged in	1. Click the "Translator" button in the page header or in the middle of the page	The user is redirected to the translator

Tested element	Remind password
Description	Check whether the password can be reminded
Additional data	Login

ID	Test	Prerequisites	Steps	Expected result
6.1	Remind the password with the correct login	There is a registered user	<ol style="list-style-type: none"> 1. Click the "Remind password" text 2. Enter the correct login 3. Press the "Remind" button 	A temporary password to the system is sent via e-mail
6.2	Remind the password with an incorrect login		<ol style="list-style-type: none"> 1. Click the "Remind password" text 2. Enter the incorrect login 3. Press the "Remind" button 	A temporary password is not send, the error message is displayed
6.3	Remind the password with an empty login field		<ol style="list-style-type: none"> 1. Click the "Remind password" text 2. Press the "Remind" button leaving the login field empty 	A temporary password is not send, the error message is displayed

Tested element	Change password
Description	Check whether the password can be changed
Additional data	Login, password

ID	Test	Prerequisites	Steps	Expected result
7.1	Change the password with the correct data	The user is logged in	<ol style="list-style-type: none"> 1. Click on the e-mail address in the page header 2. Click the "Change password" button 	The password is changed, the user is redirected to the dashboard

			<ol style="list-style-type: none"> 3. Enter the old password 4. Enter new password 5. Repeat the new password 6. Press the "Change password" button 	
7.2	Change the password with the incorrect old password	The user is logged in	<ol style="list-style-type: none"> 1. Click on the e-mail address in the page header 2. Click the "Change password" button 3. Enter the incorrect old password 4. Enter a new password 5. Repeat the new password 6. Press the "Change password" button 	The password is not changed, the error message is displayed

Tested element	Translator
Description	Check of functionalities in the translator
Additional data	Login, password

ID	Test	Prerequisites	Steps	Expected result
8.1	Set the status of the translation direction; choose from a drop-down list	The user is logged in	<ol style="list-style-type: none"> 1. Click on the box under the "Direction" text 2. Select the direction of the translation from a drop-down list 	The translation direction is changed
