1. Brief Description

This Use Case Specification consists of taking a photo and testing it on the premise “it is a cat/it is not a cat”.

2. Basic Flow of Events

1. The user takes a photo with the camera of his phone.
2. The user runs the test.
3. The results of the test are shown on the screen.

3. Alternative Flows

1. User doesn't like the photo took.
 - 1.1. User takes a new photo.

4. Preconditions

Preauthorization.

5. Postconditions

The photo taken is not kept on the device.

6. Special Requirements

The result of the test must be adapted to people with sight impairment.
